

# **INDUSTRIAL DEVELOPMENT CORPORATION OF ZIMBABWE (IDCZ)**

## **DEVELOPMENT FINANCING**

### **Some of IDCZ Funded Sectors.**

#### ✓ **Mineral Beneficiation.**

The Corporation provides funding to add value to our locally abundant minerals to unlock more value for the economy. Add more pics for phosphate rock and agricultural lime.

#### ✓ **Stock feed Production**

IDCZ financed the working capital requirements for a stockfeed manufacturer to increase the capacity utilisation.

✓ **Schools and Laboratory equipment**

The corporation funded the capital expenditure and working capital requirements for the company which is currently the only laboratory equipment manufacturer in Zimbabwe.

✓ **Silicates Manufacturing.**

Instead of having the country importing sodium silicate rock, the corporation provided capital funding for equipment to produce sodium silicate.

✓ **Engineering Projects.**

As the local industry is re awakening there is huge demand for engineering services in infrastructural development and supply of vast array of industrial implements and consumables . These are normally imported as the local companies did not have the capacity to meet the demand of industry . The IDCZ is assisting engineering companies in developing modern workshops with equipped foundries ,state of the art analytical laboratories and pattern making workshops , Fabrication workshops equipped with suitable machines to enable them develop any shape and size to meet local industry demand.

✓ **Timber Processing**

The IDCZ assisted the company with working capital requirements for them to purchase raw timber to meet the demand both for local and regional customers. This has resulted in the organisation engaging more employees and an increase in production. The company manufactures timber-based products using timber purchased from various sawmills and further process or value add before selling on the local market or export.

✓ **Portable Water Purification and Distribution.**

Safe and clean drinking water is a critical need for every citizen. The Corporation capacitated a company involved in purifying and bottling water with both capex and working capital requirements.

✓ **Construction Materials Production**

IDCZ Limited funded a client in the construction sector to increase capacity utilization in order to meet the market demands. The company manufactures a wide range of concrete products for the construction industry.

✓ **Furniture manufacturing**

As part of support to timber processing and revival strategy in the manufacturing sector, the Corporation financed a company in the business of manufacturing wood and shop fitting products with working capital. The company managed to procure adequate raw materials for efficient production which resulted in the increase in revenue through increased production.

✓ **Meat Processing**

The Corporation funded a meat processing company with capex to expand the abattoir and increase slaughter capacity. The client managed to supply potential export markets and increased the number of both permanent and casual workers.

✓ **Food and Beverages Manufacturing**

IDCZ Limited financed an organization in the business of manufacturing of maize and soya-based nutritious foods and beverages with working capital which was mainly used to procure raw materials such as maize, sugar and soya beans. The customer managed to increase production of instant mahewu, porridge and other cereals coupled with creation of additional jobs along the value chain.

✓ **Brick Manufacturing**

Some of our Zimbabwean clays are suitable for number of clay products which can be exploited for both the local and export markets. A customer in a business of manufacturing clay bricks such as face bricks, industrial bricks and common bricks received funding from the Industrial

Development Corporation in order to acquire plant & machinery, and working capital to boost the business.
